Dear Mr. Farley,

We write today to provide you with the following letters transmitted by the Committees to the Biden administration regarding four highly troubling companies that appear in Ford's signed agreements with Contemporary Amperex Technology Co. Limited (CATL). According to these agreements, Ford will be using information technology (IT) tools and software from these companies at its planned joint electric vehicle battery plant with CATL.

We respectfully request that Ford make available for an interview a company official who will be able to speak with us about the due diligence Ford conducted before and after it entered into the agreements with CATL.

We request that you provide Committee staff with available dates as soon as possible but no later than February 5, 2024.

To make arrangements to schedule the interview, please contact Select Committee on China staff at (202) 308-8977 and Energy and Commerce staff at (202) 225-3641.

Sincerely,
